

Manufactured (Mobile) Home

MANUFACTURED (MOBILE) HOME - GENERICLY DEFINED – A single family detached one storey home comprising one or more large factory built sections produced in full compliance with the CSA Z240MH National Manufactured Home Standard. These homes are designed and produced to offer a level of performance suitable for usage in climatic conditions found anywhere in the 10 provinces and territories

MANUFACTURED (MOBILE) HOME - TECHNICALLY DEFINED – A single family detached one storey home comprising one or more large factory built sections produced in full compliance with the CSA Z240MH National Manufactured Home Standard. Each home will bear a prominently displayed Label indicating compliance with the CSA Z240MH Standard, as well as Specification Sheet that provides technical information required by local building inspectors. Each section will incorporate longitudinal steel frame rails under the floor that become part of the permanent surface foundation system on which the home is supported. Manufactured Home foundations will be constructed in compliance with the CSA Z240.10.1 National Standard
